Equine Hindlimb Lameness Diagnostics (incl. Objective Lameness Evaluation) & Therapies

A 2-Day Practical Course

7-8 May, 2024

WestVETS (Anstead) • near Brisbane, Australia

Developed for equine veterinarians who have experience with lameness investigations, this practical course provides a critical overview of possible causes of hindlimb lameness, diagnostic anaesthetic strategies and how to interpret nerve and joint block results, via a regio-anatomic approach. Discussions on the upper hindlimb as a cause of lameness (hip joint, pelvic and sacroiliac problems) and on systemic and intra-articular joint therapies will round the course off. The 7 hours of practical and case-based sessions will give attendees plenty of opportunity to further their practical skills on live horses and limb specimens in small groups (2 – 4 people per ultrasound machine).

SPEAKERS / INSTRUCTORS:

Roger Smith *DECVS, DECVSMR* – UK

Chris O'Sullivan *DVCS, DACVS* – Australia

Harry Markwell *DACVS-LA* – Australia
