Equine Ultrasound-Guided Orthopaedic Injection Techniques & Therapies

A 2-Day Practical Course

13-14 June, 2025

Avenel Equine Hospital • Melbourne, Australia

This two-day highly practical course covers the theory and practical skills of performing ultrasound-guided orthopaedic injections and ultrasound-assisted minimally-invasive surgery covering all regions of the musculoskeletal apparatus of the horse. Bringing together internationally renowned orthopaedic experts with a strong interest in this field, this course also provides a critical overview of conventional and biologic treatment modalities for orthopaedic conditions. This course is suitable for veterinarians from mixed or equine practice who have experience with ultrasonography.

During the afternoons, 7 hours of practical sessions will give attendees plenty of opportunity to practice the different injection techniques on cadavers and specimens and to get tips and tricks in small groups (2 – 4 attendees per ultrasound machine), under the supervision of the specialists. Each attendee will rotate through the following practical stations: Tendon & ligament injections; Stifle, Hip & Shoulder Joint injections; Cervical facet joint injections; Injections of the Back; Lumbosacral & Sacroiliac injections; Injections of Bursae & Ultrasound-assisted Surgery.

SPEAKERS / INSTRUCTORS:

Henk van der Veen *Cert.ISELP* – Netherlands

David Stack *DECVS* – UK
